sainihalkonduti.com

Software and AI engineer with 3 years of combined industry and research experience building and deploying backend services and AI systems. Built production LLM/RAG pipelines, repository-aware coding assistants, multi-tenant APIs, and cloud infrastructure for model training and inference.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, Java, TypeScript, JavaScript, SQL, C, HTML/CSS, FastAPI, Spring Boot, Flask, Node.js, Express, React, Next.js
- **AI & Model Serving:** PyTorch, Transformers, LLMs, AI Agents, LoRA, PEFT, vLLM, RAG, LangChain, Sentence Transformers, Weaviate, MCP
- **Cloud & Infrastructure:** AWS (EC2, S3, CloudWatch, CodePipeline), Azure, GCP (GKE), Kubernetes, Docker, Terraform, GitHub Actions, CI/CD
- **Data & Testing:** PostgreSQL, CockroachDB, Azure Cosmos DB, MongoDB, Redis, MySQL, OpenAPI, Maven, Integration Testing
- **Architecture & Methodologies:** Distributed Systems, Microservices, RESTful APIs, ETL, Agile, Scrum

PROFESSIONAL EXPERIENCE

Infoswift Corp. | Software Engineer (AI) | Irvine, CA *Sep 2025 – Present*

- Split checkbox detection and document extraction into separate processes to release GPU memory before vLLM loaded, passing detection results via a JSON checkpoint with a CPU fallback.
- Built a Python and Gemini clinical pipeline to extract fields, repair malformed JSON, and validate reference ranges, cutting average manual review time from 10 to 6 minutes per document (40%).
- Developed a multi-tenant FastAPI service on Azure that authenticated requests with HMAC-signed JWTs and isolated each organization’s records in tenant-scoped storage.
- Cut status inquiries by 80% with a React and Express portal for 100+ insurance agents, enforcing agent-scoped quote access and rate limiting of 300 requests/min per user with IP fallback.
- Secured sign-in with Microsoft Entra External ID, MSAL-Node, server-side OAuth callbacks, and HttpOnly cookies; tied Cosmos DB onboarding approvals to immutable user IDs and tested concurrent provisioning.

Indiana University Bloomington | Research Assistant | Bloomington, IN *Jan 2026 – May 2026*

- Fine-tuned Llama 3 8B with LoRA for obstetric triage across 788 records (85/15 stratified split), selecting checkpoints by validation loss and achieving 93.5% F1 for high-acuity detection.
- Deployed 4-bit quantized inference on HPC clusters to keep patient inputs on-cluster and retrieved clinical guidelines to provide context for model predictions.

Zion Cloud Solutions (ZionAI) | AI Engineer | Glenview, IL *Jun 2025 – Aug 2025*

- Built a coding assistant that embedded repository Q&A and code with Sentence Transformers (MiniLM), retrieved context from Weaviate, and generated responses with vLLM while persisting conversation turns.
- Configured CodeGemma-7B-IT training on 676 repository Q&A examples using PyTorch, PEFT LoRA, FP16, and gradient checkpointing to fit training on a single GPU.
- Authored Terraform configurations for model training and serving on Google Kubernetes Engine (GKE), defining GPU node pools, Cloud Storage buckets, and service-account permissions.

Infoswift Corp. | Software Engineer (Cloud/AWS) | Hyderabad, India *May 2023 – Jun 2024*

- Automated releases with CodePipeline and GitHub Actions, configured CloudWatch alerts for 15+ servers, and tuned EC2 capacity and S3 lifecycle retention.

PROJECTS

CourSelect (Course Advising Platform) | github.com/CJP-Hackathon/Hackathon

- Built a Python and Flask RAG advising assistant that searched 8,983 courses with CockroachDB vector retrieval, retained student context across requests, and enforced department enrollment restrictions.
- Cached embeddings and search results while fetching prerequisites concurrently, cutting median retrieval latency for repeated queries from 1.1 seconds to under 100 milliseconds.
- Handled provider failures by routing Gemini requests to Mistral via Ollama with search fallback; deployed on AWS EC2 with background S3 uploads and tested timeout recovery paths.

Hoosier Hub: Full Stack Social App | github.com/IU-HoosierHub/server

- Developed Java Spring Boot and MongoDB APIs for student profiles, feeds, and clubs with OpenAPI and JWT auth; configured GitHub Actions CI/CD to run Maven/Checkstyle tests and deploy Docker images to Azure App Service.

EDUCATION AND CERTIFICATIONS

Indiana University Bloomington, M.S., Computer Science Aug 2024 – May 2026

B.V. Raju Institute of Technology, B.Tech., Computer Science Aug 2020 – Jun 2024

Certifications: Microsoft Certified: Azure AI Engineer Associate (AI-102) | Microsoft Certified: Azure Fundamentals (AZ-900)
